

# Make a Food Chain

### Equipment required

- Print out of the 'Make a Food Chain' worksheet, one per learner
- Pencils or pens
- Books / resources
- Internet enabled devices and internet access for independent research

### To complete the activity

1. Introduce the idea of food chains to the class and share some examples. This could be done using the other two activities within the topic.
2. Introduce the idea of independent research and explain all the sources available.
3. Encourage learners to research potential food chains in the marine environment.
4. Ask learners to share their examples with the rest of the class. The lesson could be expanded by creating class food webs from any species in the learners' food chain examples that overlap.

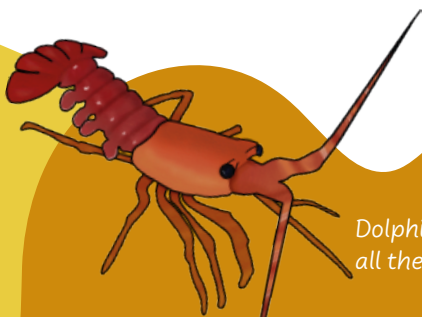

# Make a Food Chain

*Find out about food chains in the sea.*

*Use the boxes below to draw in the plants and animals you have found out about to create two food chains. Write the organism's name and whether they are a herbivore, carnivore or omnivore.*

<div></div>	<div></div>
<div></div>	<div></div>
<div></div>	<div></div>
<div></div>	<div></div>

*Dolphins don't need to drink. They get all their water from their food.*
