

Water wheel

45 - 60
mins

Teacher's pack

Topic: Water cycle

KS: 2

Activity guide:

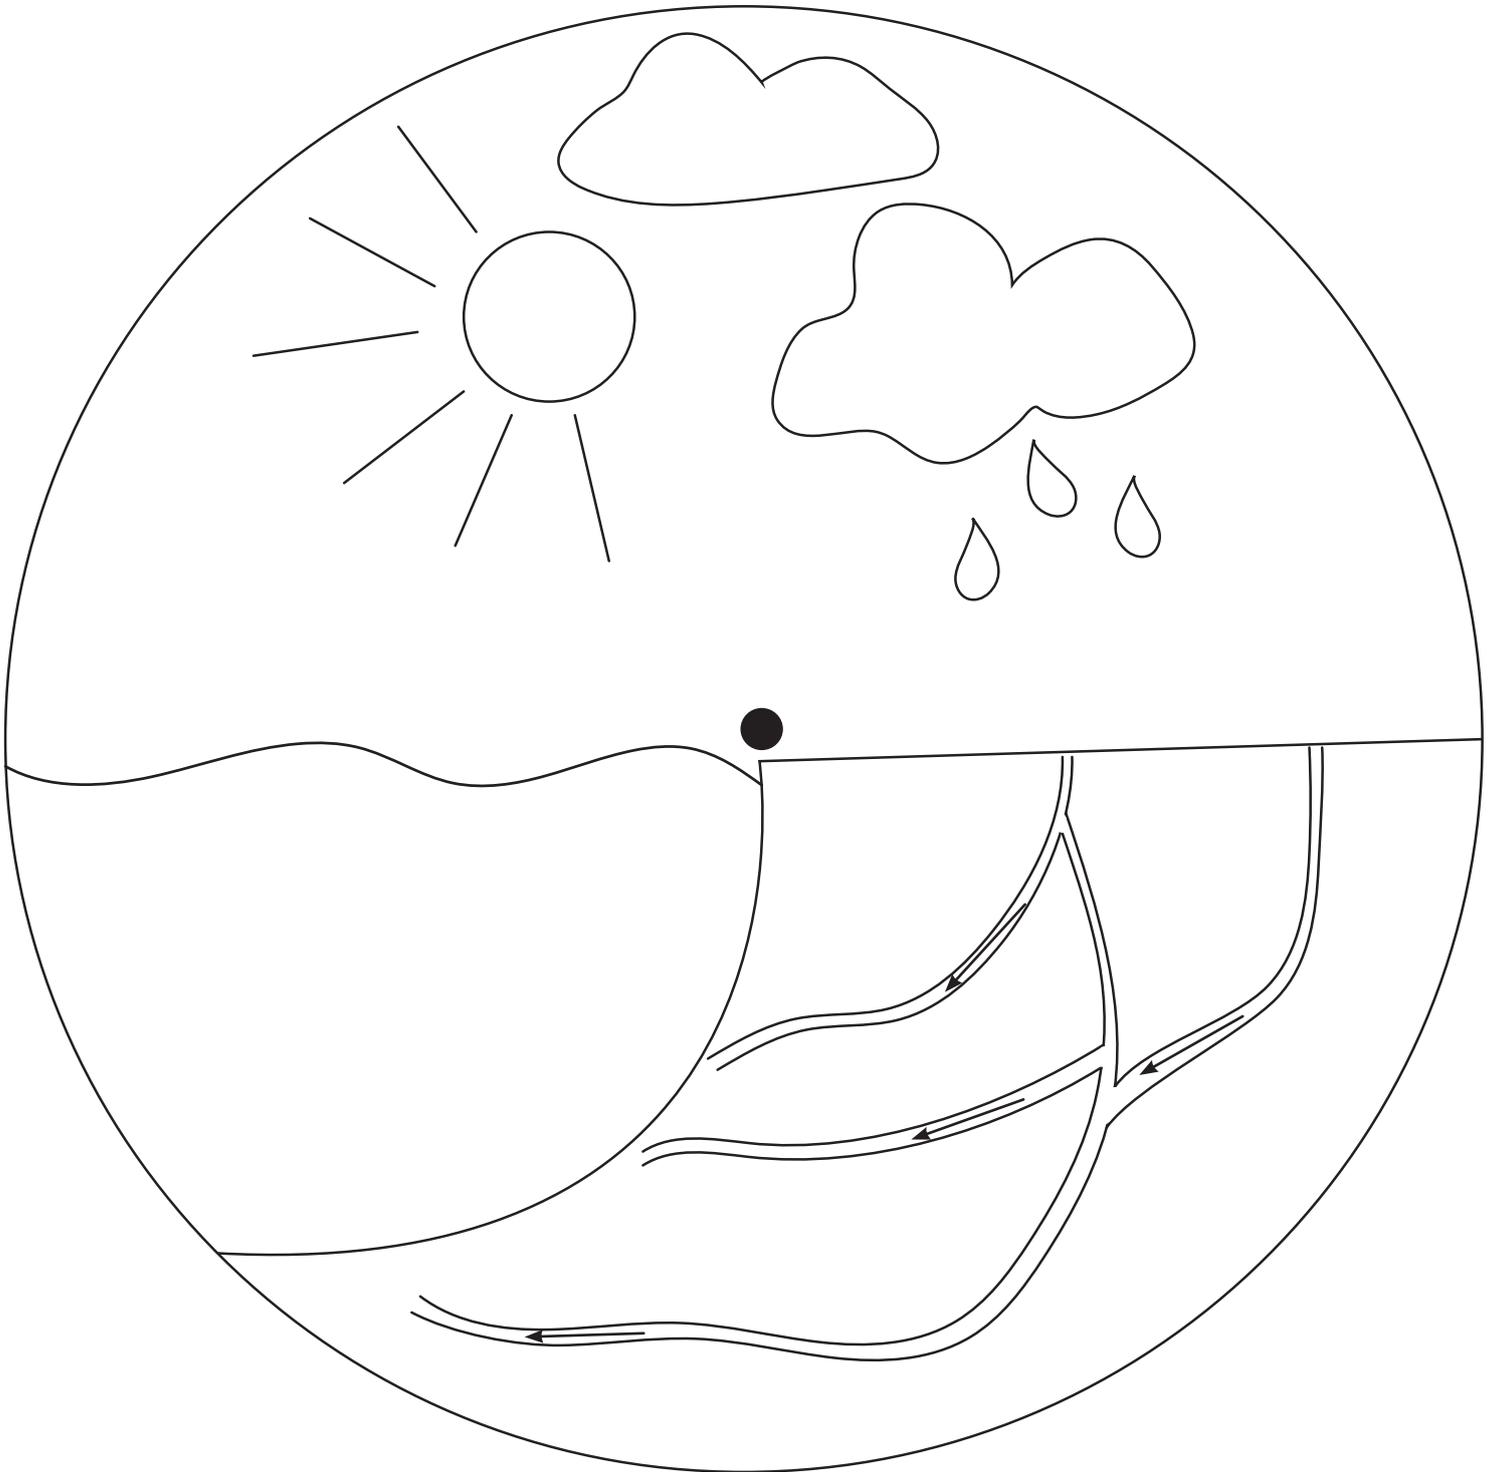

Equipment required:

- Printout of template - preferably on card or can be stuck onto a paper plate (R_WC_1)
- Scissors
- Split pin
- Glue

To do the activity:

1. Pupils are provided with copies of the water cycle template sheet (R_WC_1).
2. The pupils colour in and decorate the worksheet. Encourage them to add details like trees, mountains, sea life, different kinds of precipitation etc to make each one unique.
3. They then cut out the words and the water movement arm.
4. Align the two black central dots and put the split pin through so that the arm can be moved around the circle in the direction of the water cycle.
5. Stick the labels onto the circle in the correct places for the water movement that it refers to. Pupils can add extra information or labels to their wheel.
